## THE AEVERSA EV ECOSYSTEM

WE COVER EVERY ASPECT OF THE EV ECOSYSTEM, FROM STAGE 1 - 7.

WHETHER YOU NEED ONE COMPONENT OR THE ENTIRE SYSTEM, WE ARE YOUR EV TRANSITION GUIDE.

THE DOLLAR SIGNS SHOW ELEMENTS THAT COULD PROVIDE ADDITIONAL REVENUE STREAMS. SEE NEXT PAGE

# AEVERSA

## ECOSYSTEM BREAKDOWN EACH ELEMENT EXPLAINED

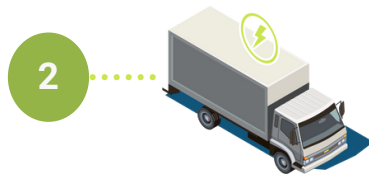

Data driven guidance along every part of the EV transition is our passion. Fleet transition is not a short-term changeover. We take the time to begin an informed transition with you through a trial that allows us to model your transition operationally and financially. This ensures a seamless and profitable roll-out, specifically designed to address your energy and cost challenges sustainably.

1

### CHARGING STATIONS

Charge your vehicles fast and reliably through a **DC fast charging infrastructure** that has a 99% up-time. We also offer **Charging as a Service** where you can rent a charging infrastructure from us enabling you to begin your EV transformation without the requirement for large upfront capital investment.

2

### COMMERCIAL EV'S

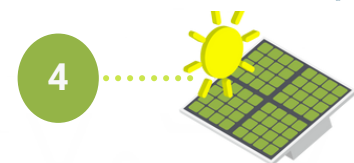

AEVERSA supplies your organisation with tried and tested **commercial EV's** that are **guaranteed by the Original Equipment Manufacturer**. Be it **scooters, light or heavy duty trucks**, we have an EV partner for every use case and budget.

3

### AE CLOUD BASED MANAGEMENT

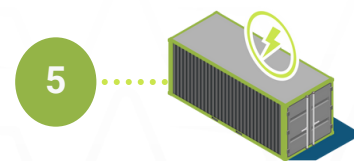

We manage the charger network **maintenance, energy efficiency** and complete **billing system** through our dedicated software system. Allowing you and us insight and control of your EV system to see if we are **saving costs** and running **operations optimally**.

4

### ENERGY GENERATION

We turn your warehouse roof into a Solar PV Power Station that powers your fleet and your facility. We ensure legally grid tied solar installations and take care of everything you need to make it happen.

5

### ONSITE STORAGE

Together, we establish the battery storage requirements that support your business model. Partnered with trusted OEM's, we then implement your unique, large-scale energy storage solution.

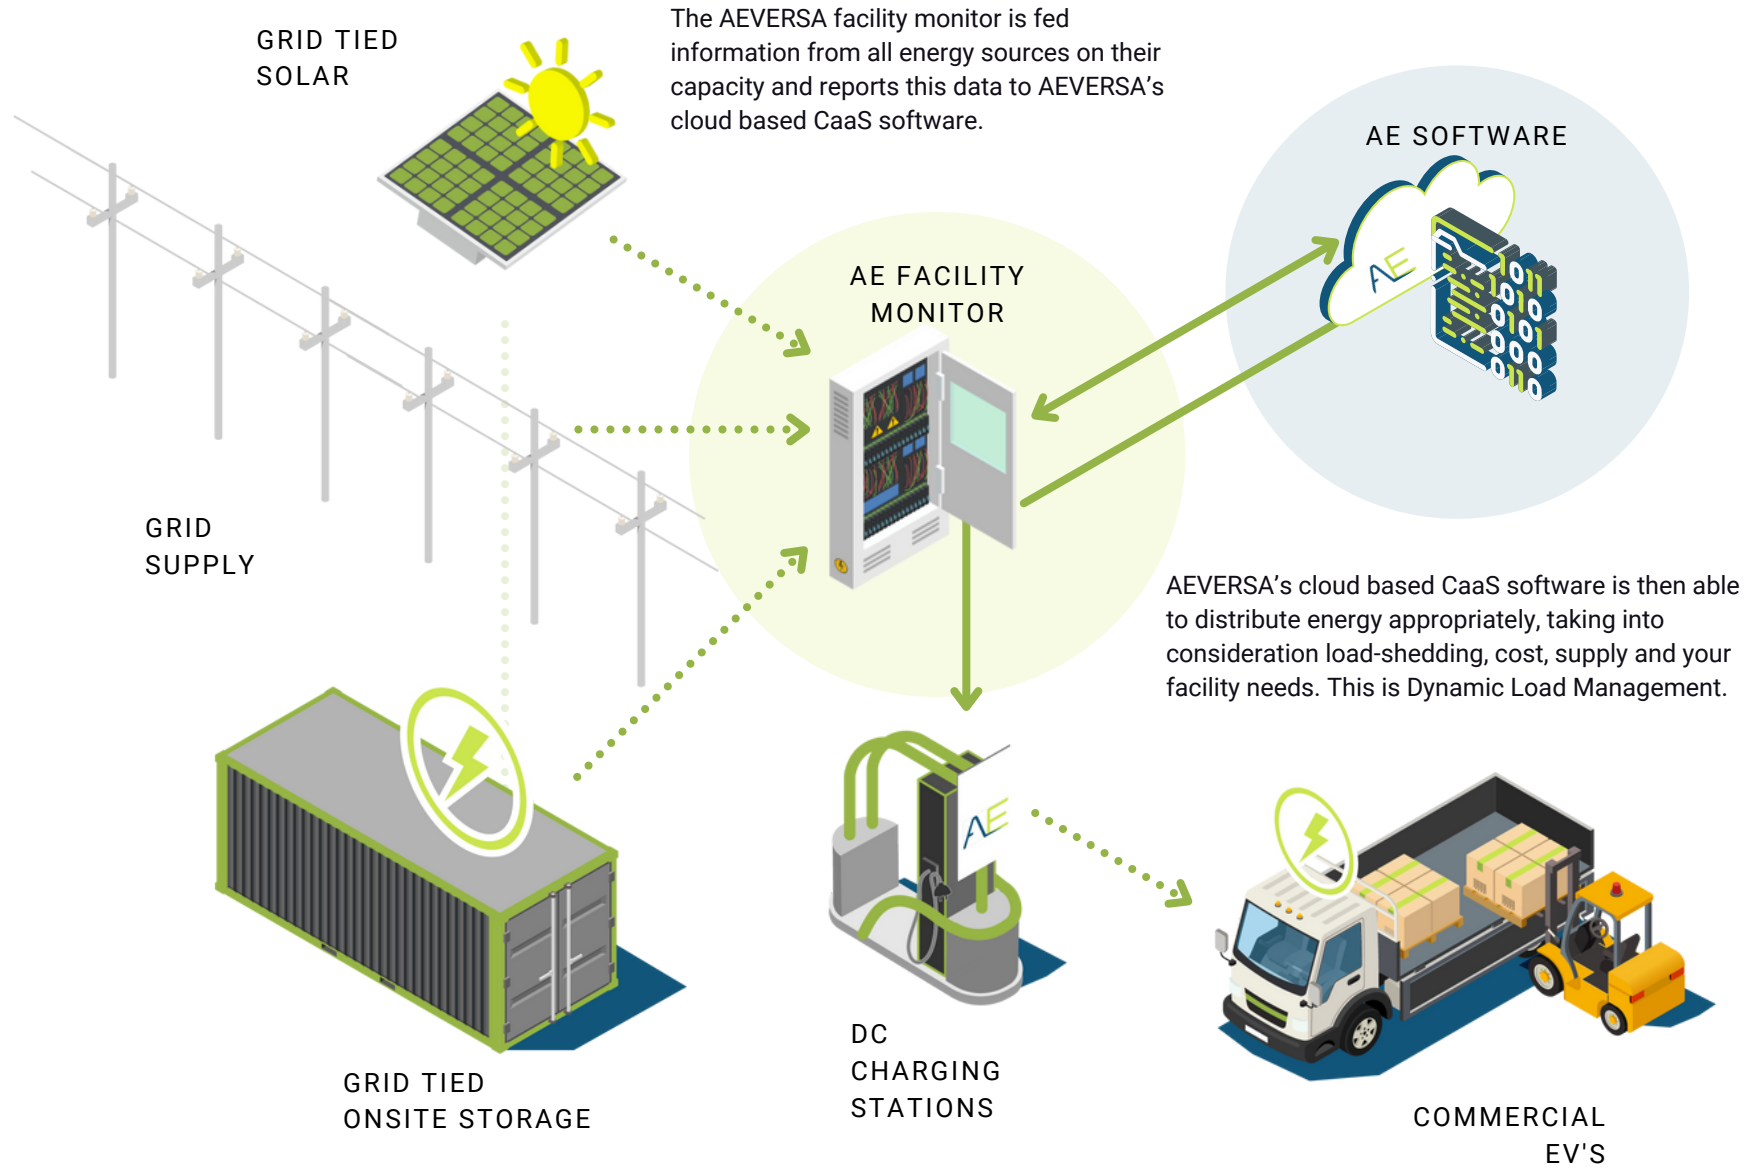

\$

### "EV READY" REVENUE STREAM

Even if you don't have EVs, solar panels, battery storage, and EV chargers can transform your depot into a revenue-generating energy hub. Monetize your warehouse roof with solar power, store energy, and lease DC chargers. Turn your logistics site into a profitable energy centre
